THE FORCE BEHIND

Education is the basis of all progress. It is for this very reason that we forayed into education, about 48 years ago. The experience has taught us that progress is possible only, if men and women are equally well educated. The entire purpose of education is not to restrict itself to imparting bookish knowledge only but inculcate humanitarian values like wisdom, compassion, courage, humility, integrity and reliability in a student. We, just like you, believe in holistic education for your child, encompassing- academics, co-curricular activities, sports education and life-skills learning. Our endeavour is to strike a balance between state- of-the-art infrastructure and an internationally acceptable education

At DALIMSS SUNBEAM SCHOOL we impart education that is based on conscience. Our endeavor is to rear a breed of young minds that are bustling with self confidence, motivation and are ever ready to take up challenges. The campus, co-curricular and academic infrastructure bears testimony to this effort. In order to promote an internationally acceptable education, our key focus has been on faculty development providing continuous teacher training in order to deliver holistic education and man making. Teachers are trained not only to teach well but are also expected to inspire confidence and trust in their students and become role models. Further, the School inculcates in the students a respect for tradition and ensures discipline and good manners.

Dr. Pradeep 'Baba' Madhok
President

DALIMSS SUNBEAM SCHOOL encourages students to learn about themselves and their constantly changing environment, while at the same time offering support and guidance as they practice decision making and social skills. We are confident that this school would be the best place for your child. We welcome your active interest and involvement in the progress and activities of your child. We look forward to your continuous support.

DALIMSS SUNBEAM SCHOOLS have taken cognizance of the specifics of the “21st Century Skills” that are integral for the readiness of the global citizens to adapt to the world most effectively.

The Teaching-Learning strategy adopted at all the DALIMSS SUNBEAM SCHOOLS is in consonance with the demand of the 21st century. The outlined skills are thus integral in the imparting of the Curriculum in alignment with the 21st Century Skills in the co-curricular and classroom activities, projects & programmes.

Learning Skills

The four Cs teach students about the mental processes required to adapt and improve upon a modern work environment. The Four Cs addresses the universal needs for any career and vary in terms of importance depending on core aspirations of individuals.

The Four Cs of the 21st Century Skills are interned in the pedagogy through Curricular and Co-curricular engagements.

i) Critical Thinking : Critical Thinking is the most important quality for finding solutions to problems. Critical Thinking Skills include:

- Information gathering
- Finding information
- Recording information
- Organizing information
- Curiosity

- Open – mindedness
- Reflection
- Evolution

i) Creativity: Thinking outside the box empowers students to see concepts in a different light, and leads to innovation which is the key to the adaptability of any project. Learning creativity requires individuals to understand that the way things may have been done have to change to fit into current demands.

ii) Collaboration: The best possible results are derived by getting students to work together, achieve compromises and get best possible results by solving a problem.

The key element of collaboration is willingness to sacrifice part of the ideas and adapt others to achieve best results for a 'greater good' and “all round success”.

iii) Communication: It is the glue that binds all these educational qualities together. It is crucial for students to effectively convey ideas among different personalities and eliminate confusion. Good communication skills are pivotal for progress as lack of communication causes inability to see objectives making whole projects to fall apart.
